

VARIABLE MASS FLOW (VMF)

A patent pending product

- **Converts any 3-phase fixed speed compressor to a variable speed.**
- **Controls & monitors the compressor by temperature sensors rather than pressure transducers**
- **Precise room temperature and humidity control**
- **Voltage optimization and eliminates inrush current**
- **Decreases noise levels**
- **Protects your compressor from short cycling**
- **Protects your compressor working with abnormally high discharge temperatures**
- **DOES NOT interfere with your existing controls**
